-

Project: Job Portal

Link: <https://mernjp-client.vercel.app/>

Tech Stack: React.js, Tailwind CSS, JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, Clerk (Authentication), Cloudinary API

Description:

Developed a full-featured Job Portal web application supporting two types of users: Recruiters and Job Seekers. The platform enables recruiters to post job openings and manage applicants, while users can register, browse jobs, and apply.

Roles & Responsibilities:

- Designed and implemented a responsive front-end interface using React.js and Tailwind CSS.
 - using Node.js and Express.js to manage CRUD operations for job listings and user profiles.
 - Integrated Clerk for role-based authentication and authorization for both recruiters and job seekers.
 - Managed user data, job postings, and application records using MongoDB.
 - Utilized Cloudinary API for uploading and managing user profile images and documents.
 - Ensured mobile responsiveness and optimized performance for various devices and browsers.
 - Collaborated with Git for version control and project management.
-
